COOLING CAR CAP

TECHNICAL PRINCIPLES

Rui ling radiation cooling technology, cognitive, overturns the range of heat in the atmosphere on the surface of the earth and outer space (~270°C), through the launch of the wavelength of 8 to 13 um infrared technology, the erection of a heat transmission channel not absorbed by the atmosphere of the universities, cool in the sun but the next can universities, achieve zero energy 24 hours continuous cooling.

Cool fabric formed by the junction of base cloth and radiation cooling coating, by high atmospheric transmission window hand infrared emission ability will hear flowing to the outer space cold source transfer in university, colleagues by using the reflection of solar radiation energy of high ability to minimize solar heat absorption, thus achieve significant cooling effect, the whole process without refrigeration, energy consumption and can quickly achieve the cooling effect is remarkable.

Product Features:

- **Cooling:** Efficient radiative cooling, insulating solar energy.
- **Environmental protection:** No additional energy consumption.
- **Reflection:** Reflection, blocking sunlight.
- **Self-Cleaning:** Hydrophobic, oleophoic, antifouling, and easy-cleaning.
- **Water resistance:** The surface has lotus leaf effect, and the fabric is im pervious to water.
- **Dust resistance, easy-cleaning:** Water-repellent and do not attract dust.
- **Durability:** High anti-ultraviolet, anti-aging.

COOLING HALF COVER TEST REPORT

- Test results:
1. The maximum temperature difference inside the car reaches 49.5°C when the refrigeration half-cover is used and the half-cover is not used. The test method and test results are applied to appendix B of ENTERPRISE Standard Q/ZMF 004-2021 (Comparison of temperature differences test methods).
 2. The higher the ambient temperature, the greater the temperature difference inside the car, the better the refrigeration (cooling) effect.

Test item: Contrast test of temperature difference
Test place: Zhejiang Mingfeng Industrial Co., Ltd
No.7 Bade road Tiantai county Zhejiang
Test date: September 1, 2021
Test time: 9:00 am to 16:00 PM
Temperature of the day: 24°C~36°C (sunny)
Test model: Volkswagen Tiguan (white)

Excellent Performance:

In extreme Sunday, the Car interior temperature can reach 60°C to 80°C, but the temperature will be lowered 40°C to 50°C after having snow land cover on. The cooling performance will be better when the temperature is higher.

Cooling Car Cap Test Site:
Date: June 27 2021, Time: 14:32,
Add: China Auto Aftermarket show Zhengzhou, China.

Testing result:
Air temperature 37.6°C Car interior temperature without cover on 84.2°C.
Car interior temperature with cover on 38.8°C.
